ELSEVIER

Fire Safety Journal 36 (2001) V–VIII

FIRE SAFETY JOURNAL

www.elsevier.com/locate/firesaf

Contents of Volume 36

Volume 36 Number 1

1 Comparison of empirical and semi-empirical calculation methods for venting of gas explosions
D. M. RAZUS (Romania) & U. KRAUSE (Germany)

25 Dependence of flashover on assumed value of the discharge coefficient
A. N. BEARD (UK)

37 Comparison of different combustion models in enclosure fire simulation
H. XUE, J. C. HO & Y. M. CHENG (Singapore)

55 An apparatus for screening fire suppression efficiency of dispersed liquid agents
J. C. YANG, M. K. DONNELLY, N. C. PRIVÉ & W. L. GROSSHANDLER (USA)

73 The effect of particle coagulation and fractal structure on the optical properties and detection of smoke
A. YU. SNEGIREV, G. M. MAKHVILADZE & J. P. ROBERTS (UK)

97 Erratum

I Calendar

Volume 36 Number 2

99 A comprehensive study of externally venting flames — Part I: Experimental plume characteristics for through-draft and no-through-draft ventilation conditions and repeatability
S. KLOPOVIC & Ö. F. TURAN (Australia)

135 A comprehensive study of externally venting flames — Part II: Plume envelope and centre-line temperature comparisons, secondary fires, wind effects and smoke management system
S. KLOPOVIC & Ö. F. TURAN (Australia)

173 Photoacoustic gas detection for fire warning
P. W. NEBIKER & R. E. PLEISCH (Switzerland)

181 Assessing fire damage to r.c. elements
P. CIONI, P. CROCE & W. SALVATORE (Italy)

201 Rise of plume front from starting fires
G. HESKESTAD (USA)

I Calendar

Volume 36 Number 3

205 The effect of microscopic and global radiative heat exchange on the field predictions of compartment fires
J. X. WEN, L. Y. HUANG & J. ROBERTS (UK)

225 Numerical model of upward flame spread on practical wall materials
E. G. BREHOB (USA), C. I. KIM (South Korea) & A. K. KULKARNI (USA)

241 Structural modelling of light-timber framed walls in fire
S. A. YOUNG & P. CLANCY (Australia)

269 Stochastic modelling for occupant safety in a building fire
A. M. HASOFER & D. O. ODIGIE (Australia)

291 The effects of angular orientation on flame spread over thin materials
J. G. QUINTIERE (USA)

I Calendar

Volume 36 Number 4

313 Behavior of flames spreading downward over napped fabrics
S. CHARUCHINDA, M. SUZUKI, R. DOBASHI & T. HIRANO (Japan)

327 Modelling occupant interaction with fire conditions using the buildingEXODUS evacuation model
S. GWYNNE, E. R. GALEA, P. J. LAWRENCE & L. FILIPPIDIS (UK)

359 A systemic approach to fire safety management
J. SANTOS-REYES & A. N. BEARD (UK)

391 Predicting the piloted ignition of wood in the cone calorimeter using an integral model — effect of species, grain orientation and heat flux
M. J. SPEARPOINT & J. G. QUINTIERE (USA)

Book Review

417 Fire, static and dynamic tests of building structures, by G. S. T. Armer and T. O'Dell; E & FN SPon, London (Reviewed by A. S. USMANI)

419 Announcement and Call for Papers

I Calendar

Volume 36 Number 5

421 A theoretical explanation of the influence of char formation on the ignition of polymers
S. D. WATT, J. E. J. STAGGS, A. C. MCINTOSH & J. BRINDLEY (UK)

437 Plume flow in high rack storages
H. INGASON (Sweden)

459 Behaviour of precast concrete floor slabs exposed to standardised fires
G. M. E. COOKE (UK)

477 Modeling of gas flow and temperature fields in underground coal fires
J. HUANG (China), J. BRUINING & K.-H. A. A. WOLF (Netherlands)

491 On the wind advection influence on the fire spread across a fuel bed: modelling by a semi-physical approach and testing with experiments
A. SIMEONI, P. A. SANTONI, M. LARINI & J. H. BALBI (France)

Book review

515 An Introduction to Mathematical Fire Modeling, 2nd edn. Marc L. Janssens; Technomic Publishing Co., Lancaster, PA, USA (Reviewed by V. BABRAUSKAS)

III Contents of related journals

Volume 36 Number 6

519 The contribution of radiant heat transfer to laboratory-scale fire spread under the influences of wind and slope
F. MORANDINI, P. A. SANTONI & J. H. BALBI (France)

545 Phase Doppler interferometry measurements in water sprays produced by residential fire sprinklers
J. F. WIDMANN (USA)

569 Variation of heat release rate with forced longitudinal ventilation for vehicle fires in tunnels
R. O. CARVEL, A. N. BEARD, P. W. JOWITT & D. D. DRYSDALE (UK)

597 Simulation of ventilation and fire in the underground facilities
L. H. CHENG, T. H. UENG & C. W. LIU (ROC)

621 Call for Papers

I Calendar

Volume 36 Number 7

623 The who, what, where and why of waking to fire alarms: a review
D. BRUCK (Australia)

641 Flashover control under fire suppression conditions
V. NOVOZHILOV (Singapore)

661 Simulating one of the CIB W14 round robin test cases using the SMARTFIRE fire field model
Z. WANG, F. JIA, E. R. GALEA, M. K. PATEL & J. EWER (UK)

679 Structural performance of rotationally restrained steel columns in fire
F. ALI & D. O'CONNOR (UK)

693 Deflagrations involving stratified heavier-than-air vapor/air mixtures
J. D. DEHAAN, D. CROWHURST, D. HOARE, M. BENSILUM & M. P. SHIPP (USA)

Book Review

711 *Fire retardant materials*, A. R. Horrocks & D. Price. Woodhead Publishing, Cambridge (Reviewed by T. KASHIWAGI)

715 The FORUM for International Cooperation on Fire Research: A position paper on evaluation of products and services for global acceptance
P. A. CROCE

I Calendar

III Contents of Related Journals

Volume 36 Number 8 2001

Special Issue

Response of Composite Steel Framed Structures to Fire

Preface

719 Special Issue on Response of Composite Steel Framed Structures to Fire
D. D. DRYSDALE (UK)

721 Fundamental principles of structural behaviour under thermal effects
A. S. USMANI, J. M. ROTTER, S. LAMONT, A. M. SANAD & M. GILLIE (UK)

745 Modelling of heated composite floor slabs with reference to the Cardington experiments
M. GILLIE, A. USMANI, M. ROTTER & M. O'CONNOR (UK)

769 Analytical assessment of the structural performance of composite floors subject to compartment fires
A. Y. ELGHAZOULI & B. A. IZZUDDIN (UK)

795 Non-linear structural modelling of a fire test subject to high restraint
Z. HUANG, I. W. BURGESS & R. J. PLANK (UK)

815 Heat transfer analysis of the composite slab in the Cardington frame fire tests
S. LAMONT, A. S. USMANI & D. D. DRYSDALE (UK)
